Historical Context:

This 'Iron Bridge' as it is known locally replaced a pontoon built by Royal Engineers in 1854 to connect North and South Camps. The bridge is present on the 1872 OS map (1:2500). Given the importance of the bridge in providing a formal linkage between camps and forming an integral part of the processional route of soldiers along Queens Avenue, this building is included on the List of Buildings of Local Significance due to its high evidential, historic, aesthetic and community values.
